Harri Soini

Software & Web Developer

Harri Soini is a skilled & passionate full stack developer with 13+ years of experience and a broad technical skill set in building interactive standard & e-commerce websites. He is known his ability to create logical & innovative solutions to complex problems and to juggle multiple pressing projects simultaneously, meeting all deadlines.

I am a client-focused negotiator who places emphasis on helping clients determine their needs and providing resources to meet their goals, dedicate to build project exactly how client want.

I stay active in various freelance associations, I network with other developers, and I regularly attend local meet up meetings. I am able to work solo or in a team environment.

Experience

2020 - 2022

Full Stack Developer – NoRestLabs (<https://norestlabs.com>)
